6082 ALUMINIUM

COMMERCIAL ALUMINIUM ALLOY

PRODUCT DESCRIPTION

Offering the highest strength of all 6000 series alloys, 6082 is often referred to as a ‘structural alloy’. Used predominantly in high stressed applications such as bridges, cranes and roof structures, the alloy’s extruded finish is not as smooth as others found in the 6000 series so is not so aesthetically pleasing. In many applications, 6082 has replaced 6061 as a result of a number of factors including excellent corrosion resistance with good machinability.

KEY FEATURES

- Highest strength alloy in 6000 series
- Excellent corrosion resistance
- Good machinability
- Replaced 6061 in many applications

APPLICATIONS

- Highly stressed applications
- Bridge construction, cranes, roof trusses
