

Bespoke Supply Solutions

REVOLUTIONISE YOUR SUPPLY CHAIN

Page: 1 of 1

We maximise your supply chain efficiency

We offer a range of **value-added supply options** that underline our philosophy of being the complete service provider.

Many clients are happy with simple supply services where materials are ordered and delivered on an item-by-item basis. However, more customers require greater levels of service. We offer a full range of bespoke supply solutions to these customers. Continual investment in our unique IT platform allows us to develop unrivalled purchasing options and supply chain innovations which are fully scalable to suit you.

Simple or complex

Our solutions may be as simple as implementing consolidated billing or as complex as Thames acting as your dedicated raw materials warehouse - the choice is yours.

How it works?

- 1 A detailed telephone conversation would take place to gain an understanding of the areas where you feel you could benefit from a streamlined supply chain
- 2 Arrange a visit to your premises where a member of our team will gain a deep understanding of your current business processes and explain some of the solutions that are available, some of which you may not know even exist!
- 3 If required, further meetings with members of your procurement, planning and engineering departments would take place to ensure every aspect of your supply chain has been evaluated
- 4 From all the information gathered a BSS package would be built and then presented to you and any members of your team you wish to involve. A full explanation of the value added and through cost benefit of each feature will be discussed in detail
- 5 Once we have agreed through cost targets an implementation plan would be put in place, if changes are required we return to stage 3 or 4
- 6 Implementation takes place with no impact on manufacturing, a member of our team is nominated as your point of contact to provide on going support and to ensure regular review meetings are undertaken
